# Install Unity

Install Unity version
You must use:
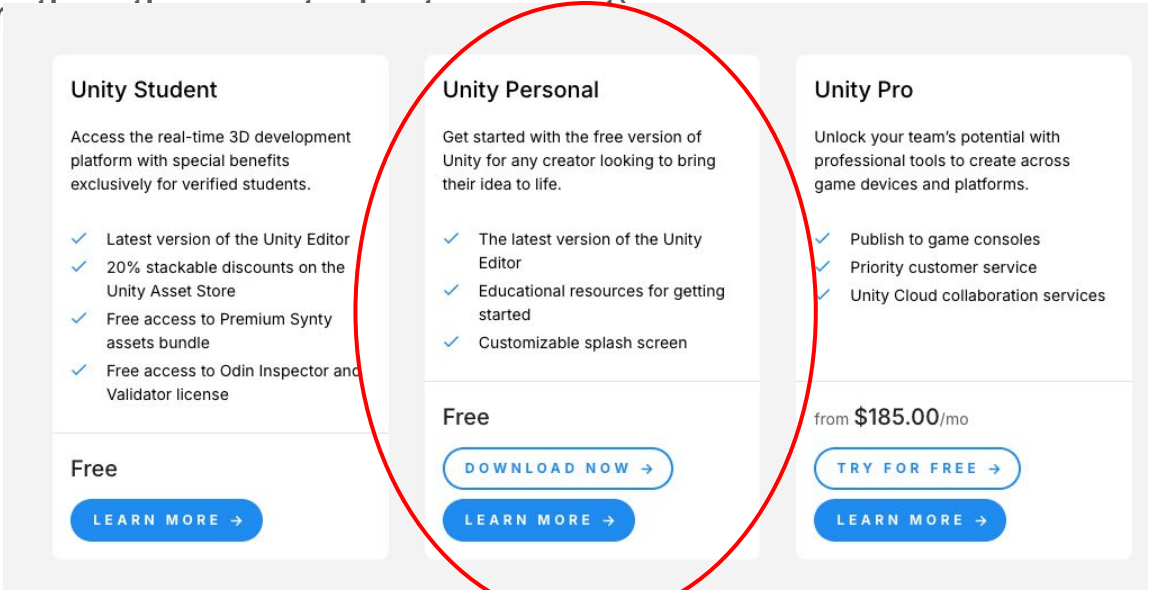

Mac / PC 6000.1.9f1

Make A Unity Account

- Navigate to https://unity.com/
- Create a Unity ID / Account
- This will be a personal account and we recommend using a non uwe email.
-

- When prompted opt for a (free) Unity Personal account (r̶a̶t̶h̶e̶r̶ ̶t̶h̶a̶n̶ ̶a̶ ̶s̶t̶u̶d̶e̶n̶t̶ ̶a̶c̶c̶o̶u̶n̶t̶)
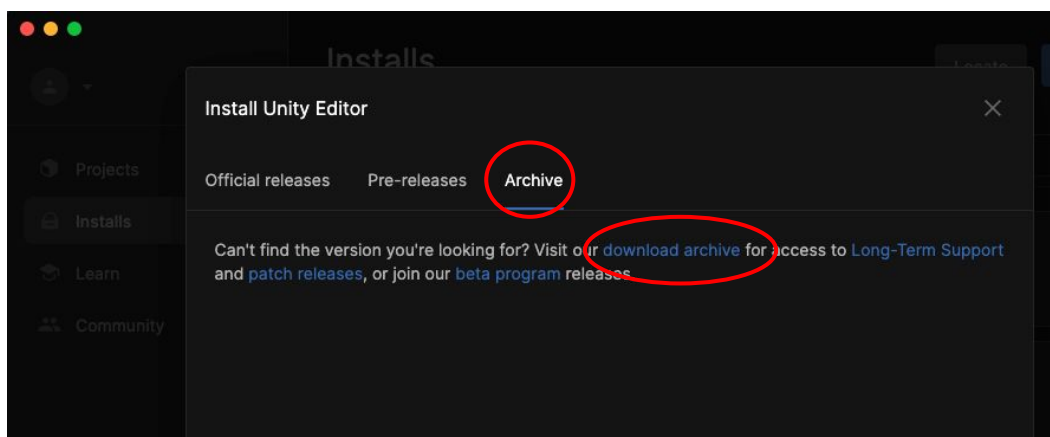

Download Unity Hub

- Navigate to https://unity.com/download
- Download unity hub and open it
- Log in

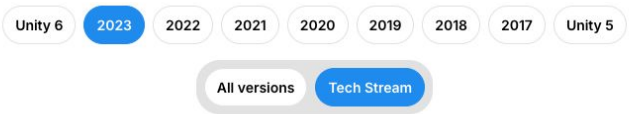

- Open Unity Hub and go to 'installs'
- Click Install Editor

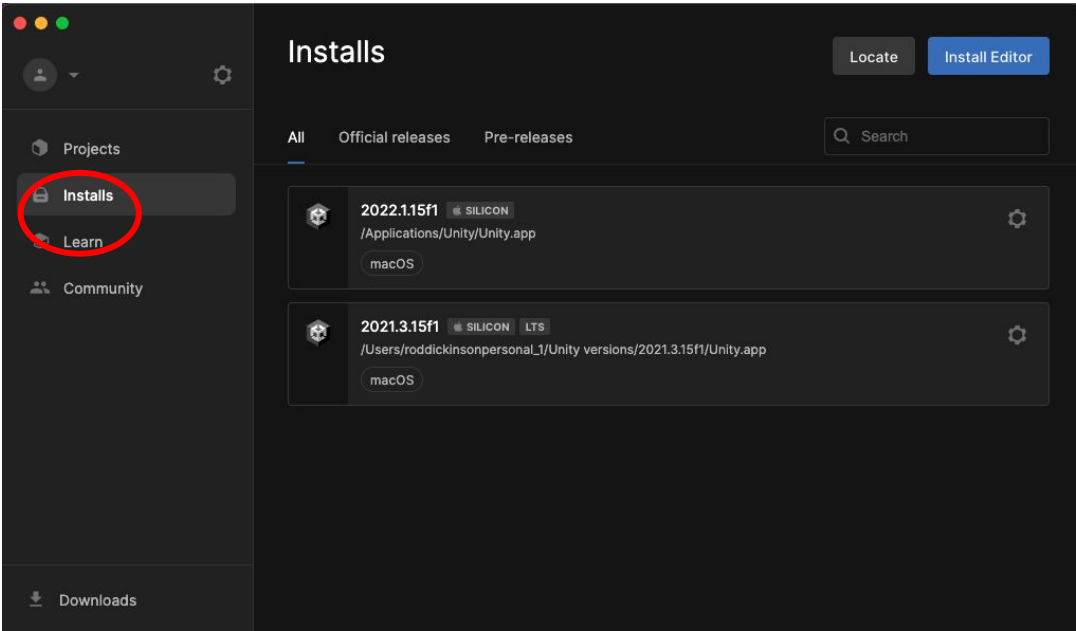

- Click 'download Archive' which will take you to https://unity.com/releases/editor/archive

Download Unity into Unity Hub

- At https://unity.com/releases/editor/archive
- Scroll down until you find the right Unity version
  2023.2.20f1
- This is the only version we are working with
  Important we may not be able to open and mark any projects made with other versions of Unity

Version	Release date	Release notes	Hub installation	Downloads
2023.2.20f1	Apr 25, 2024	Read	INSTALL →	See all
2023.2.19f1	Apr 18, 2024	Read	INSTALL →	See all

- Click to Download into Unity Hub
- Unity will install on your machine into Unity Hub.
- Be aware this is up to an 17gb download

- Once the Unity version you are downloading appears in 'installs' in Unity Hub you are ready to begin!
